Symbol - When you need to increase throughput at the checkout counter, track and control medications at the pharmacy or hospital, manage inventory or process identification documents, Symbol offers the right bar code scanner for your application and environment.

Long recognized for their durability, Symbol barcode scanners are designed to maximize productivity even in less than optimum conditions. Because when you're able to keep the line moving faster at checkout, track medications, and control inventory more accurately, even in the harshest environments, **revenues increase**.

Symbol's corded and cordless scanners are the foundation of the mobile enterprises and work seamlessly with other networks and information systems, so you can cost-effectively build and adapt as your business grows.

Handheld Scanners

CS1504 **Handheld Barcode Scanner**

Give your customers the power of mobile shopping

Symbol's "shopping buddy", the CS1504 is a portable scanner that allows customers to buy your products while they're on the go.

Features and benefits:

- Fits in a pocket or purse, or can be attached to a keychain
 - Lets shoppers scan for further information on price, availability, features, rebates, special offers or similar products
 - Outside the store, customers can use the device to scan embedded information in your advertisements and catalogs, create shopping lists, purchase items or link to the Web for more information.
-

DS6607 Handheld Image and Barcode Scanner

Give your customers the power of mobile shopping

Symbol's "shopping buddy", the CS1504 is a portable scanner that allows customers to buy your products while they're on the go.

Features and benefits:

- Fits in a pocket or purse, or can be attached to a keychain
- Lets shoppers scan for further information on price, availability, features, rebates, special offers or similar products
- Outside the store, customers can use the device to scan embedded information in your advertisements and catalogs, create shopping lists, purchase items or link to the Web for more information.

DS6608 Handheld Barcode Scanner

Laser-like performance meets digital imaging versatility

Symbol's DS6608 handheld scanner lets you scan and decode all types of bar codes from any angle with laser-like speed and accuracy.

Features and benefits:

- By accurately reading both one-dimensional (1D) and two-dimensional (2D) symbologies, lets you manage mixed-use reading requirements without having to buy or manage additional devices
- Features a charge coupled device (CCD) image sensor, similar to those found in high-end digital cameras, which allows it to capture and process bar codes as quickly as a laser scanner
- Omni-directional scan pattern enables your employees to scan bar codes from any angle

DS6700 Handheld Digital Imager Scanner

Enhance employee productivity and reduce costs with a multi-use scanner/imager

Maximize employee productivity and streamline business processes in the retail store, at the post office, in the pharmacy and on the manufacturing floor with a handheld device from Symbol. With the DS6700, you get the power of a bar code scanner, digital camera and document scanner in a single, cost-effective device.

From point-and-shoot simplicity to extremely reliable bar code scanning and the ability to scan full size documents including fine print the DS6700 is the right tool for the job.

Features and benefits:

- Flexibility to scan all one-dimensional (1D), two dimensional (2D) and PDF417 bar code symbologies, with laser-like accuracy from any angle, with a single device
- Omni-directional scanning, video viewfinder, wide working range and other easy-to-use features increase productivity for users of all experience levels
- Remote Scanner Management reduces the time and cost associated with the day-to-day management of handheld devices
- Multi-use functionality lowers capital and operating expenses with fewer devices to purchase, manage and support
- Superior document clarity lets records be upgraded from paper to electronic
- Multiple on-board interfaces ease integration with the host system into the future, for outstanding investment protection

LS1203 Handheld Scanner

Big streamlining for small retailers

The LS1203 handheld scanner is ideal for gift shops, boutiques, video, sporting goods stores, jewelers, florists and more. Easy to use, it delivers high quality laser scanning at an affordable price.

Features and benefits:

- Delivers the features, functionality and reliability needed to improve operational efficiencies from the checkout line to the back room
- Minimizes manual keying
- Ensures that customers are charged the correct amount
- Automates paper-based inventory processes
- Integrated multiple interfaces help ensure connectivity to host and PC systems now and in the future

LS2208 Handheld Barcode Scanner

Create a more productive mobile environment

This high-performance, affordable handheld scanner will help you increase productivity at the retail point of sale and in the stockroom, manage medications and control inventory, or help you track assets and inventory — without breaking the bank.

Features and benefits:

- Offers an impressive range of contact to 17" along with a high-speed scan rate
- Lightweight, ergonomic design
- Multiple on-board interfaces allow use with different host systems

LS4208 Handheld Barcode Scanner

Create a more productive mobile environment

Symbol's LS4278 Bluetooth™- enabled cordless laser handheld scanner delivers superior scanning anywhere in the workplace, helping boost productivity and profitability. The LS4278 is an outstanding choice for retail, healthcare or light industrial environments.

Features and benefits:

- Rapidly scans all types of one-dimensional (1D) bar codes, including damaged symbols or stacked symbology (RSS) bar codes
- Minimizes need for manual data entry
- Optional Intellistand automatically transitions between handheld and presentation scan modes to accommodate large or bulky items
- Multiple on-board interfaces and universal cables allow use with different host systems
- Supports reduced space symbology (RSS) to ensure compatibility with emerging standards
- Remote Scanner Management (RSM) support dramatically reduces management effort and cost

LS4278 Cordless Handheld Bar Code Scanner

Check out the latest development in cordless scanning

Symbol's LS4278 Bluetooth™- enabled cordless laser handheld scanner delivers superior scanning anywhere in the workplace, helping boost productivity and profitability. The LS4278 is an outstanding choice for retail, healthcare or light industrial environments.

Features and benefits:

- Enables users to hold at any angle and scan even the smallest, stacked or poorly one dimensional (1D) printed bar codes
- Single board construction eliminates common inter-connection failures
- Scratchproof tempered glass exit window
- Industrial long-life charging contacts that can withstand 250,000+ insertions into cradle
- Frees cashier to move from behind cash wrap to scan items out of reach, large heavy items, as well as check for missed items
- Minimizes need for rescans and manual data entry
- Multiple on-board interfaces and universal cables allow use with different host systems
- To ensure compatibility with emerging standards, the LS4278 cordless scanner supports reduced space symbology (RSS), and is
- Remote Scanner Management (RSM)-ready so it can be efficiently upgraded from a central location

Hands-Free Scanners

LS7708 Hands-free Bar Code Scanner

Keep check out lines moving

Optimize point-of-sale response with Symbol's LS7708, a high-performance presentation and swipe scanner

Features and benefits:

- Advanced technology accelerates scanning and point-of-sale throughput
- Provides a multi-line rastering, omni-directional scan pattern, which eliminates the need for operators to line up bar codes with scan lines
- Available for presentation or swipe scanning
- Features a secondary scanner port enabling you to connect a handheld scanner for scanning heavy or cumbersome items
- Offers the most dense scan pattern of any slot scanner on the market for higher first-pass read rates
- To ensure compatibility with emerging standards, the LS7708 supports reduced space symbology (RSS) and 14-digit global trade item number (GTIN) bar codes. And, multiple on-board interfaces allow you to use your scanner with different host systems.

LS7808 In-Counter Slot Scanner

Maximize retail counter space and enjoy exceptionally accurate scanning

Accelerate the checkout process and create a sleek, uncluttered sales counter with the LS7808 in-counter slot scanner. With high first-pass read rates from any angle, it gives your cashiers more time to focus on providing customers with personalized service. And, because this scanner is so intuitive and easy-to-use, even inexperienced cashiers are up and running in minutes.

Support for a secondary handheld scanner enables large, bulky items to be scanned while in the cart. This eliminates the need for cashiers and customers to lift heavy purchases and risk injury.

Features and benefits:

- Automatic reconstruction of poorly printed or damaged bar codes, delivers exceptionally high first-pass read rates and throughput at the point of sale
- Flush-mount, slot design reduces clutter on the sales counter and is easy to use - just slide the product and go
- Integrated electronic article surveillance (EAS) connectivity enables cashiers to simultaneously capture the bar code and deactivate the EAS tag
- On-board support for multiple POS interfaces ensures seamless integration with the host system, as it evolves
- Comprehensive support for one-dimensional bar codes, including Reduced Space Symbology

LS9203 Omni-Directional Presentation Scanner

Increase sales and tighten inventory control

The high-value, cost-effective LS9203 omni-directional bar code scanner enhances profitability by driving more accurate sales transactions and enabling better inventory management.

Features and benefits:

- Ideal for small retail operations and institutional organizations requiring dependable data entry
- Features omni-directional scanner designed for both hands-free and handheld scanning of bar codes
- Increases accuracy of transactions and tracking of inventory, while reducing the costs associated with scanner maintenance, training and operations
- Ease of deployment and durability combine to lower total cost of ownership
- Small form factor suits retail environments in which counter space is at a premium
- Integrates with your existing POS solution to offer more detailed and timely information about sales — giving you insights into customer behavior

LS9208 Hands Free Barcode Scanner

Get into the fastest moving line

Ideal for the checkout counter, this high-speed presentation bar code scanner saves time for customers and employees.

Features and benefits:

- High-performance processor and innovative 100-line rastering omni-directional scan pattern lets you quickly capture bar codes no matter how they are presented — allowing you to speed checkouts, keep lines short and customers satisfied
- Small footprint and integrated Checkpoint Electronic Article Surveillance (EAS) antenna save counter space
- Side-mounted trigger lets operators activate single-line scan mode to read bar code menus or pick lists
- Switches easily between handheld and hands-free
- To ensure compatibility with emerging standards, the LS9208 supports reduced space symbology (RSS) and 14-digit global trade item number (GTIN) bar codes. And, multiple on-board interfaces allow you to use your scanner with different host systems.

M2000 Cyclone Hands Free Barcode Scanner

Superior scanning today and tomorrow

The M2000 Cyclone® hands-free bar code scanner is able to decode current and emerging symbologies, making it an investment that meets current and future scanning needs.

Features and benefits:

- One device that decodes both one dimensional (1D) and PDF 417 bar codes
- Provides four different scan patterns, allowing operators to easily switch, depending on what they're scanning (i.e. merchandise, customer driver's licenses)
- Enables operators to use one device even when there are multiple data collection needs — such as in retail, healthcare, warehousing and shipping environments
- Intuitive and easy to use, immediately switches from hands-free to handheld mode when lifted off the counter
- Automatically adjusts the scan pattern for optimum handheld data capture
- To ensure compatibility with emerging standards, the M2000 supports reduced space symbology (RSS) and 14-digit global trade item number (GTIN) bar codes. And, multiple on-board interfaces allow you to use your scanner with different host systems.
