Scanning and Verifying Systems

Bar Code Scanners and Readers Manufactured by

unitech

Unitech

Founded in 1979 to provide local markets with customized microprocessor-based automation systems and since the beginning, we've focused on quality as one of our goals to achieve long-term success. For over twenty years, Unitech has focused on automatic data collection products and services to enhance productivity and efficiency.

In 1985 we successfully launched our AIDC product lines, which have been growing ever since. Presently, we manufacture a full range of AIDC products, including barcode scanners, magnetic card readers, portable and fixed terminals, and a variety of keyboard products.

Barcode Wand/Pen Scanners

MS100U (USB) Bar Code Wand

Product Line Information
The MS100U bar code wand is targeted toward low reading volume and cost effective solutions. The advanced optics and electronic design convert bar code labels into a high quality digital signal. Able to read color, faded and low contrast barcodes quickly and accurately, the MS100U is a proven solution.

Features & Benefits
• Easy to use and configure
• High scan speed
• Low power consumption
• Rugged, lightweight design
• **USB** interface
• Wide read angle
• 1 year warranty

MS120 Pen Scanner

Product Line Information
The MS120 Series Bar Code Wands are targeted toward low reading volume and cost effective solutions. The advanced optics and electronic design convert bar code labels into a high quality digital signal. Able to read color faded and low contrast barcodes quickly and accurately the MS120 is a proven solution. The polished sapphire tip reduces wear on labels and is also easily replaced if damaged. The MS120 is available with three different interfaces. The MS120A is an undecoded model that interfaces via a 9-Pin squeeze release connector. The MS120-2 has an RS232 interface with a built-in decoder. With a keyboard wedge (AT or PS-2) interface the MS120-3 also has a built-in decoder. It's shape gives the MS120 the comfort and handling of a normal ink pen. Just sweep the tip of the wand across the bar code in either direction and listen for the good read beep that lets you know the data has been successfully captured. It doesn't get any easier than that.

Features & Benefits
- Durable, replaceable saphire tip
- Easy to use and configure
- High scan speed (5 ~ 200 cm/sec)
- Keyboard wedge and RS232 interfaces available
- Low power consumption
- Rugged, lightweight design
- Wide read angle (0 ~ 45 degrees)

Handheld Scanners

MS210 Contact CCD Scanner

Product Line Information
The MS210 Barcode Scanner is a reliable low cost bar code reader suitable for a wide range of environments. Its features and price make it the best solution for retail medical and light industrial applications. In addition the IBM PC XT-AT keyboard wedge interface supports 8 different character sets. The powerful built-in decoder reads and discriminates all major symbologies reducing processing time and labor costs while increasing accuracy. The decoder also allows editing and modifying scanned data before sending it to the host device. Barcode menus provide extensive configuration options. The settings can then be cloned to other readers through the use of custom bar code labels.

Features & Benefits
- Advanced Data Editing features
- Easy to use and configure
- Hands-free operation for retail applications
- Low power consumption
- Reads damaged labels
- Reads most commonly used bar code symbologies
- Replaceable interface cable
- Solid-state technology
- Superior contact scanning
- Supports multiple interfaces
- No laser safety issues - No warning labels that create potential concern

MS330 Long Range Scanner

Product Line Information
The MS330 from Unitech delivers easy-to-use, reliable performance at an affordable price for bar code reading applications in retail, office automation, post office, healthcare, and many others in light industry. With a rugged design to minimize down time, the rugged MS330 is designed to withstand a 5 foot (1.5 meter) drop test and has built-in Electro-Static Discharge protection.

Features & Benefits
- 5 year limited warranty
- Adjustable hands-free stand for easy reading
- Clear adjustable audible beepers and visual good read LED ensure positive feedback to user
- Easy programming using Windows based software or bar codes
- Fast reading and decoding of all major linear bar codes
- Interchangeable cable design
- Long range CCD scan engine
- Robust design withstands 5 foot (1.5 meter) drop to concrete

MS331 CCD Scanner

Product Line Information

The MS331 from Unitech delivers easy-to-use, reliable performance at an affordable price for bar code reading applications in retail, office automation, post office, healthcare, and many others in light industry. Reliable Performance Featuring a built-in long range CCD scan engine, the MS331 provides users with extra depth of field and a scanning width up to 18cm. The reliable reading and decoding performance makes data collection tasks easier. A clear and adjustable audio beeper and visible good LED ensure positive feedback to the user. Configuration of the MS331 is fast and easy, thereby reducing start-up time and cost. To further reduce costs, the MS331 has an interchangeable cable design, which allows users to change interfaces by little more than replacing a cable. Rugged Design To minimize down time, the rugged MS331 is designed to withstand a 5 foot (1.5 meter) drop test. ESD (Electro-Static Discharge) protection from 8KV Contact and 12KV Air. User Friendly Rugged, yet ergonomic and light design makes the MS331 a user-friendly scanner. The gun design helps users to operate the MS331 comfortably for bar code reading in non-desktop applications. A stylish hands-free stand makes desktop applications really easy.

Features & Benefits
- Robust design withstands 5 foot (1.5 meter) drop to concrete
- Easy programming using Windows based software or bar codes
- Interchangeable cable design
- Clear adjustable audible beepers and visual good read LED ensure positive feedback to user
- Fast reading and decoding of all major linear bar codes
- Long range CCD scan engine
- Adjustable hands-free stand for easy reading

MS690 Laser Scanner Series

Product Line Information

Its high speed scanning low power consumption and effective depth of field make the MS690 Series Wide-Angle Laser Scanner suitable for a wide range of applications. Furthermore our powerful decoder allows data to be edited and formatted before it is sent to the host. This feature saves time and money by making software changes unnecessary. The decoded MS690 supports keyboard wedge interface for PC XT-AT PS-2 Macintosh and over sixteen popular terminals. Wand emulation and serial RS232 are also supported. When used as a keyboard wedge the operation of the keyboard remains unaffected. It uses a 3-in-1 interface that makes it easy to select and replace connection cables. Like with our other products configuration of the scanner is fast and easy. A bar code menu provides extensive setup options. A simpler quick setup menu lets users configure common features. Once ready the configuration can be cloned and applied to other units through the use of custom bar code labels. This is very useful when you need to deploy large installations. It is the right scanner for office automation retail and light industrial applications.

Features & Benefits
- Adjustable hands-free stand for retail applications
- Advanced Data Editing features
- Easy to use and configure
- High performance scan engine
- Reads and discriminates commonly used bar code symbologies
- Replaceable interface cable
- Superior long reading distance
- Supports configuration cloning through custom bar code labels
- Supports multiple interfaces

MS830 Scanner

Product Line Information

Sleek and lightweight, the MS830 withstands multiple 5-feet drops onto concrete floor, thanks to its surrounding rubber nose and bumper. Its high-speed scanning, low power consumption and effective depth of field, make the MS830 series suitable for a wide range of applications. Furthermore, our powerful decoder allows data to be edited and formatted before it is sent to the host, which saves time and money by making software changes unnecessary.

Features & Benefits
- Adjustable hands-free stand for retail applications
- Advanced Data Editing features
- Dark slate-gray color
- Easy to use and configure
- High performance laser scan engine
- PS/2, AT, RS232, USB & Wand interfaces supported
- Reads and discriminates commonly used bar code symbologies
- Replaceable interface cable
- Simple scanner setup via Scanner Configuration Manager software
- Superior long reading distance

MS860 Wireless Laser Scanner

Product Line Information

Sleek and lightweight, the wireless MS860 withstands multiple 5-feet drops onto concrete floor, thanks to its surrounding rubber nose and bumper. Its high-speed scanning, low power consumption and effective depth of field, make the wireless MS860 suitable for a wide range of applications. Furthermore, our powerful decoder allows data to be edited and formatted before it is sent to the host, which saves time and expense by making software changes unnecessary.

Features & Benefits
- Superior long reading distance
- Adjustable hands-free stand for retail applications
- Advanced Data Editing features
- Easy to use and configure
- High performance laser scan engine
- PS/2, AT, RS232, USB & Wand interfaces supported
- Reads and discriminates commonly used bar code symbologies
- Reads up to 30 yards/meters from cradle
- Replaceable cradle interface cable
- Dark slate-gray color
